EDUCATION

San Diego State University
(B.S. in Computer Science, Minor in Applied Mathematics)

3.5 GPA

EXPERIENCE

Isola Group – Machine Learning Engineer Intern (July 2025-Present)

- Developed a cloud-based customer inquiry automation system using Azure Functions, Power Automate, and Large Language Model APIs, improving scalability and removing manual triage.
- Developed web pages supporting automated inquiry workflows and internal triage systems

July AI - Technical Ambassador (March 2025-June 2025)

- Leveraging professional networks, delivering presentations to audiences of 500+, and working closely with an AI-driven team with an emphasis on LLMs, Prompt Engineering, and Red Teaming.
- **Increased user base by over 20% in one month**, and developed a reimplantable playbook for future ambassadors.

SDSU Urban Computing - Research Assistant (September 2024-Present)

- Conducted research under the supervision of Dr. Xin Zhang on diffusion-based spatio-temporal generative models ([STGAIL](#)) using PyTorch and GCNs to enhance urban traffic prediction. Designed custom evaluation metrics and optimized encoder-decoder performance through GPU-accelerated training.

Coding Minds - Instructor (April 2024-July 2025)

- Instructing on **Java**, **C++**, **Python** languages, and topics like Web Development and Generative AI.

PROJECTS

Multi-threaded Delivery Service

- Created a C++ multi-threaded delivery simulator implementing WSClock page replacement and multilevel page tables for virtual memory optimization.

Brain Tumor Segmentation

Built a U-Net-based medical image segmentation pipeline using PyTorch and HuggingFace datasets, achieving high Dice coefficients in CT tumor detection.

AI Voice Clone

Designed and trained an RNN-based voice cloning model using spectrogram embeddings; integrated data preprocessing and post-processing pipelines, achieving ~85% MOS similarity score.

liamseidel.com

- Built from scratch using **HTML**, **CSS**, and **JavaScript**.

SDSU

Related Coursework

- Data Structures | Machine Organization | Advanced Programming Languages (C++, C, Python, Scala) | Computer Architecture | Artificial Intelligence (search, logic, decision tree, cost functions) | Machine Learning (CNN, RNN, LSTM, Transformers, GANs, SVM, backpropagation) | Operating Systems (virtual memory, multithreaded programming) | Calculus 1 & 2 | Discrete Mathematics | Linear Algebra | Statistics | Advanced Linear Algebra (SVD, Principal Component Analysis) | Neural Networks | Foundations of Deep Learning | Speech Processing |

Clubs

Artificial Intelligence Club

- Project Lead for the Brain Tumor Segmentation.

eLeet Coders Club

- Collaborated to improve Leetcode resume

Tau Kappa Epsilon Fraternity

- Philanthropy Event Organizer

Skills

- Languages: Python, C++, Java, C, SQL
- AI/ML Frameworks: PyTorch, Tensorflow, HuggingFace
- Tools: Git, MongoDB
- Soft Skills: Teamwork, Communication, Public Speaking
